By Nicole Tulis, Lafayette, CO

The hardworking, food creators making up American Agri-Women welcomed me without hesitation to their Mid-Year meeting in Denver, Colorado, April 8-11. Many of my preconceived notions of the agricultural industry were challenged and changed by the information I learned from both speakers and members. Because this is an organization which represents a wide array of sectors in the agricultural industry and regions of our country, there are many different opinions among members. I found it amazing that these women presented a solid and united front.

The first speaker to address this group was GB Oliver from the Paragon Foundation. Mr. Oliver spoke movingly of his legal struggles against those seeking to take away property rights. Lessons learned from his mistakes were disclosed and good advice was given to those experiencing the same problems. Whether it is fighting the U.S. government, or non-profit environmental groups, the bulk of advice centered around the importance of using the U.S. Constitution when engaged in these struggles.

Saturday’s speakers were Jacque Matsen from the National Cattlemen’s Beef Association and Amanda Nolz from BEEFmagazine.com. Jacque Matsen gave a workshop about what the Agri-Women could do at a personal level to spread the truth and improve their industry’s image. It was discouraging when Ms. Matsen put on the projection screen the names of the very powerful and extremely well funded anti-agricultural groups. The audience learned that it is necessary to know before donating to or making a partnership with an organization, where its funds are being spent.

Amanda Nolz went into more detail about the power of social networking on the internet and grass roots organizing. She also talked about the importance of being frank with ourselves and our children about the circle of life.

By Sunday, the ladies had spent enough time in the hotel conference rooms. Members attended an off-site tour of the American Agri-Women Mid-Year Meeting continued on page 4

L-R Kimmi Lewis, Private Property Rights chair, La Junta, CO; GB Oliver, Alamogordo, NM; Nicole Tulis, Lafayette, CO, author of this article.

L-R Jacque Matsen, NCBA; Chris Wilson, AAW president; Amanda Nolz, BeefMagazine.com
Dear AAW Members,

I hope you are having a great spring! Here we are balancing planting of crops, livestock needs, agrotourism groups, end of school activities and preparing for the high school graduation of my oldest daughter, Joanna. Joanna has attended AAW meetings with me since she was a baby, and it’s breathtaking to think she is now already at this stage in her life. She looks forward to joining Collegiate Agri-Women. So I am reminded of the great foresight in our organization to pave the way for and involve the next generations. Our new membership brochure, thanks to Nationwide Agribusiness, features four generations of the Bowers family of Oregon Women for Agriculture on the cover - a great testament to the work of AAW spanning the generations of women involved in agriculture.

We had a great Mid-Year Meeting in Denver, CO, last month. Thanks to all who were able to participate as we welcomed new affiliate organizations and developed our updated Positions. New affiliates include Black Hills Women in Timber, Colorado Agri-Women, Kansas Federation of Animal Owners, New York Agri-Women, Progressive Agriculture Safety Days, and Women’s Mining Coalition. Thanks to First Vice-President Karen Yost and the Membership Committee for their work with these new affiliates!

Mid-Year Meeting was also our first opportunity to live videocast from our meeting. Thanks to Farm Credit, members everywhere were able to “tune in” on the internet to hear Mid-Year speakers G.B. Oliver of Paragon Foundation, Jacquie Matsen of National Cattlemen’s Beef Association and Amanda Nolz of Beef Magazine. All did an outstanding job helping us focus on key issues facing agriculture.

Thanks to the Paragon Foundation for promoting AAW by including a full-page full-color picture of AAW’s Rosie the Riveter in the last issue of Paragon’s beautiful magazine Cowboy Way. Paragon Foundation is providing us with further opportunities to promote AAW through their magazine. If you don’t already subscribe, you’ll want to and can go to www.paragonfoundation.org to be sure you receive the publication. GB and Paragon are doing a great job helping farmers and ranchers protect property rights.

Syngenta hosted 16 AAW members in the 2010 AAW Leadership At Its Best Class. What a great group! We were privileged to be the first group to be trained in the use of social media and to participate in Syngenta’s Ning Social Website for the LAIB program. If you are a LAIB graduate, you’ll want to participate in this site, which features information and networking opportunities for graduates of the program.

The American Agri-Women tv show began airing nationwide on May 4. The weekly show may be seen on InCountry Television (www.incountrytelevis.com). InCountry tv is channel 230 on DISH and channel 344 on DIRECTV. If you are not able to receive it, the programs are also online at the AAW website: americanagriwomen.org by clicking on the orange Risk Management button. Thanks to everyone who has helped with these shows and appears in them! It’s been a great team effort! RFD-TV would also like to host these shows, although the timing didn’t work to have them on as soon as they are airing on InCountry, but that may be possible later on. Please pass the word to your family and friends about our American Agri-Women Show.

In June, we will have the AAW Fly-In to D.C., to work with agencies and on the Hill to advance our positions that were approved by the Board of Directors at Mid-Year Meeting. More information for the June 13-16 Fly-In may be found online or in this issue. AAW has been conducting these annual fly-ins for 25 years. The topic for this year’s annual AAW Symposium, hosted by our past national presidents, is “Agriculture Under Siege: Why and How We Need to Be a Force for Truth for Agriculture.” The Symposium will be broadcast again this year.

I am sending out electronic news alerts with information such as how to participate in the live videocasts, Symposium broadcast and about upcoming tv shows.

Danell Kalcevnik, the new Colorado Agri-Women President, speaking at the meeting organizing CAW, told how she learned about AAW at the Syngenta Leadership program she attended for the National Association of Wheat Growers – and how AAW’s Vision impressed her. That impressed me – that our vision is so important and makes a strong connection with women in agriculture. AAW has the resources, tools and partners to accomplish our Vision: “We are a force for truth, a reasoned non-partisan voice for the agricultural community to the public.”

Chris
AAW Annual Fly-In & Symposium

June 13-16, 2010

Sunday, June 13
3:00 p.m.  Briefing at L’Enfant Plaza Hotel -480 L’Enfant Plaza SW - (202) 484-1000
5:00 p.m.  Depart hotel
6:00 p.m.  Dinner and tour – Monuments at night
By 9:00 p.m.  Return to hotel

Monday, June 14
7:45 a.m.  Bus departs hotel for USDA
9:00 – 11:45 Annual AAW Symposium: Agriculture Under Siege
12:15 p.m.  Lunch at American Council of Life Insurers
2:00 p.m.  Bus departs for EPA
2:30-4:00  Meetings at EPA
4:30 – 5:30  Embassy visit
5:45 - 7:00  Reception sponsored by The Fertilizer Institute, 820 1st Street, NE, Suite 430
7:30 p.m.  Return to hotel

Tuesday, June 15
7:30 a.m.  Bus departs hotel for USDA – 14th and Independence
8:00 a.m.  Immigration update
8:30 a.m.  Animal ag issues update
9:00 a.m.  Briefings at US Department of Agriculture - Williamsburg Room #104 A
12:30 p.m. Lunch at USDA, Executive Dining Room, sponsored by Americans for Secure Retirement
1:30 – 4:45 Capitol Hill visits to Congressional Offices
5:00 – 5:30 Meeting in House Agriculture Committee Room
5:30 - 7:30 Congressional Reception, House Agriculture Committee Room
Return to hotel on our own

Wednesday, June 16
9:00 Meetings at US Commodity Futures Trading Commission
Noon Bus makes drops at Union Station, Reagan International Airport and hotel

AAW Fly-In Registration Form • 2010 Fly-In June 13-16

Registration Fee: $100 (No partial registration.)
Send form with payment, ASAP, to: AAW, c/o Carolyn Kleiber, Treasurer, P.O. Box 111, Hillsboro, KS, 67063
Phone: 620-947-3094 • Fax: 620-947-2476 • Email: treasurer@americanagriwomen.org

American Agri-Women Leadership Institute Launched by Ron Wilson, “Roads Scholar”

By Abby Dechant, Alma KS

At the AAW Mid-Year meeting in Denver, the opening sessions included a pre-cursor to the pilot program “Agri-Women Leadership Institute” (ALI).

Ron Wilson, director of the Huck Boyd National Institute for Rural Development in Manhattan, Kansas, facilitated the first half of the session. Ron provided the women with information on leadership styles and how they have progressed in time. Ron’s session was titled “Leadership Learnin’: Lessons from a Roads Scholar.”

The leadership lessons that Ron has learned along the gravel roads of the ranch include:

#1. Do your chores. As Ron reflected on his first lesson on the farm, he recalled chores as his first responsibility and priority. The lesson is to manage self with an emphasis on performance and productivity.

#2. Help your Pardner. Ron emphasized the lessons of team work in fence building and other ranch tasks. The lesson is to work together to create win-win relationships, collaborations and alliances.

#3. Aim for the Horizon. Ron told of his first day on the harrow, and the emphasis that his father put on making straight rows. As Ron crossed the field, he diligently watched the harrow behind him to be sure that it was pulling straight, directly behind the tractor. However, without an eye on the horizon ahead of him, the line harrowed across the field was wavy, crooked and unacceptable. The lesson is to set lofty but attainable goals with benchmarks to guide you.

Kris Zilliox, AAW Leadership Chair, is developing the curriculum for the leadership institute. Kris asked for the group’s input on subject matter and topics.

The Purpose of ALI will be to “empower members of American Agri-Women with the skills and abilities needed to be stronger leaders in their homes, communities, farms, businesses and the agriculture industry.” The Mission of ALI will be: Agricultural leaders committed to personal and professional progress.

The program will be unveiled in November at the AAW Convention in St. Louis, MO. The first class will have 20 students. Members will have to apply for the program and 20 will be selected by lottery. The curriculum will be delivered in person at AAW Meetings and through webinars throughout the year.

I am a suburban mom who thought the Humane Society of the U.S. used most of their funds to stop dog fighting and provide shelter to abused and abandoned cats and dogs. Don’t think so... A donation to my local shelter might be a better idea. I thought at least half the farms in America were owned by corporations. Wrong again. I did not know the Farm Bill contains provisions for food stamps.

If the urban and suburban consumer understood the structure of the American agricultural industry, there would be more sympathy for this sector of our population. Pro-agriculture groups must use the weapon their adversaries have been using the past 20 years... Get information to consumers when they are young.

The most eye-opening statement made to me was “other industries are allowed to use scientific advancement safely, why can’t we?” American Agri-Women is a dynamic group. They very simply want to grow healthy food for their families and the consumer and I thank them for it.

Editor’s Note: Nicole Tulis is the daughter of my longtime friend, who lives in Boulder. With her two sons in school now, she hopes to begin a new career as a freelance writer/photographer.
2010 American Agri-Women
POSITION STATEMENTS

AGRICULTURE BUSINESS
AND ECONOMICS

TAXATION

Capital Gains Tax on Sale of Farmland
1. AAW supports broadening of the $250,000/$500,000 exemption available on the sale of a personal residence to apply to the sale of farmland. Farmers and ranchers can easily exceed the threshold in a year when their income spikes and when they liquidate their operations.

Health Insurance for Self-Employed Individuals
2. AAW applauds the acceleration of the deduction for health insurance for the self-employed at 100%. However, AAW supports moving the deduction from page one of Form 1040 where it is deductible for federal income tax only, to schedules F or C, where it is deductible for self-employment tax as well.

Estate & Gift Tax
3. AAW is concerned that the popular move to eliminate the estate tax carries with it a return to carry-over basis.*

*This would mean that farm heirs (as well as other heirs) would not get a stepped up basis for property they inherit, making property acquired via inheritance and later sold subject to very large capital gains taxes. While we do not object to the elimination of estate tax, we call for transparency in the ultimate product and a fair analysis of all related provisions. In lieu of total elimination, AAW supports an individual exemption of $5 million to $10 million, indexed for inflation.

Long-Term Security and Retirement
4. AAW supports legislation to encourage individuals to provide themselves with a guaranteed stream of income for life. Specifically, AAW supports a proposal that would create a tax incentive for lifetime payouts from individual annuities. It would allow individuals to exclude from taxation 50% of income received from an individual lifetime annuity, up to $20,000 annually.

Depreciation Recapture on Retirement
5. AAW supports a change in the depreciation recapture rules when farm and other business depreciable assets are sold on retirement or cessation of business. Currently the amount of depreciation taken on most assets is recaptured as ordinary income, thereby eliminating the benefit of a more favorable capital gains tax rate for most businesses who sell their business assets on retirement.

Special Exemptions for Depreciation
6. AAW supports special exemptions for purchases of machinery and equipment, land improvements, livestock, and buildings.

INSURANCE

Health Insurance, Prescription Drugs & Medicare
7. AAW supports legislation that allows associations to offer group health insurance plans to individual members and small businesses.
8. AAW supports the concept that citizens of the United States should have access to the best medical service available, just like our U.S. government officials. We believe this is best delivered by private enterprise. Any legislation should reflect that view.
9. AAW respects and supports continued research.
10. AAW supports the coverage by health insurance and Medicare of the reasonable cost of outpatient drugs.
11. AAW supports the right of Americans to legally purchase medications from the most economical source.
12. AAW supports Medicare payments to rural health professionals and facilities at the same level as their urban counterparts.
13. AAW supports a proposed change in Medicare to include paying for nutrition counseling for those over age 65 and the disabled population who suffer from chronic conditions (i.e. high blood pressure, high cholesterol and diabetes).
14. AAW supports a health care system:
   • that increases competition in the form of voluntary purchasing alliances to help smaller employers and individuals buy insurance at a reasonable rate rather than in the form of government-mandated bureaucracies;
   • that employers with temporary or part-time employees will be exempt from legislation that would require them to pay for health care coverage;
   • within which decisions for specific testing and hospital stays should be determined by medical professionals.
   • that continues to develop and use paraprofessional programs in rural communities as well as programs to encourage doctors and nurses to locate in rural areas.

Long-Term Care Security
15. AAW supports continuation of government assistance in caring for the elderly who are truly without resources.
16. AAW, at the same time, supports legislation to encourage individuals to provide themselves with a guaranteed stream of income.

Crop Insurance
18. AAW supports crop insurance as a viable alternative within the Farm Program as a necessary SAFETY NET at an affordable cost to producers.
19. AAW supports the reinvestment of any savings from additional cuts to traditional budget baselines for existing farm safety nets of direct and counter cyclical payments be made in crop insurance to better meet the risk management needs of all U.S. producers. AAW recognizes that current proposed cuts to the budget baseline for farm safety net options are ill-timed.
20. AAW supports reforms to the crop insurance program to:
   • provide in all regions of the country affordably priced, adequate coverage that is actuarially sound and voluntary;
   • require participation in crop insurance for eligibility in government crop disaster programs.
21. AAW supports requiring crop insurance for only crop disaster programs and not for other federal agriculture programs. Participants should have the option to not participate in the crop insurance program and thus not be eligible to collect insurance or government disaster payments.
22. AAW supports the strict enforcement of crop insurance regulations with regard to abuse of the program. Producers should be held to the highest standards. Those who commit crop insurance fraud should be held accountable and fined at the maximum level.

LEGAL CONCERNS
23. AAW supports the legislative process for determining major agricultural policy.
24. AAW strongly opposes any federal agency expanding their regulatory authority without going through the legislative process.
25. AAW opposes any effort to amend and/or
abolish the existing rules of the Electoral College. We oppose any compact or entity circumventing the Electoral College as it currently exists.

26. AAW supports the Open Equal Access to Justice Act (EAJA) of 2010. The EAJA was established by Congress to ensure that individuals, small businesses or public interest groups with limited financial capacity could seek judicial redress from unreasonable government actions. The Open EAJA is intended to force transparency and accountability on the large bureaucracies of the federal government.

AGRICULTURAL LABOR
AAW believes labor-intensive agriculture in the U.S., especially fruits and vegetables, livestock and poultry, greenhouse and nursery, dairy and Christmas trees, could face a dire labor crisis. There are estimates that 50-70% of the workforce lacks legal status, and the costly and difficult H-2A program provides less than 3% of the workforce. Food is a strategic resource for the United States, and the stability of our domestically produced food supply and other agricultural industries is at risk.

27. AAW supports reform of the H-2A program which is covered in the AgJOBS legislation (Agricultural Jobs, Opportunities, Benefits and Security Act, H.R.2414/S.1038 [2010]).

28. AAW supports a guest worker program with a realistic admissions level that will be a legal channel for workers to enter the country.

29. AAW supports a workable employment verification system where workers can be verified.

30. AAW supports a legal channel for the experienced workforce that is feeding America and sustaining our industries.

31. AAW supports strong border security.

32. AAW supports a secret ballot as the way for workers to vote for union representation.

BIOFUELS
33. AAW supports biofuels tax credits to offer consumers alternative transportation fuels and offer farmers additional markets for corn and soybeans.

INTERNATIONAL TRADE ISSUES
International Trade Negotiation and Policy
34. AAW supports the strict implementation of all international trading rules to prevent unfair practices by competing nations and to assure unrestricted access to domestic and world markets. Furthermore, we believe that all trade agreements should be continually evaluated.

35. AAW believes that quality standards for imported products should meet the same standards required for U.S. products. Imported foods should meet the same grading and safety standards as domestic products.

36. AAW supports equivalent sanitary and phytosanitary regulations as part of any free trade agreement.

37. AAW opposes the use of false trade barriers and punitive tariffs in trade negotiations and policy development.

38. AAW supports payment of the technology fee on biotech seed by all who use the seed—not just those in the United States. The requirement that this additional fee be paid on all biotech seed planted in the U.S. is a distinct trade disadvantage to U.S. farmers by increasing their cost of production.

39. AAW supports cooperative efforts for international market development and promotion programs.

Border & Port Inspections
40. AAW supports USDA Animal and Plant Health Inspection Service having the responsibility for border and port inspections with the appropriate increase in funding. We believe that inspection of our food supply at the ports of entry should be increased.

Sanction Reform
41. AAW believes that unilateral sanctions have not proven to be an effective means to further foreign policy goals and are disruptive to international food trade.

International Organizations and Trade Agreements
42. AAW recognizes the World Trade Organization (WTO) as the primary international forum for world trade.

43. AAW encourages the U.S. Trade Representative and/or the WTO to review the developing nation status definition.

44. AAW supports further liberalization of trade in agricultural products, which can be achieved through the WTO.

45. AAW supports balanced, fair international trade agreements that open international markets to U.S. agricultural products, provide for minimal production distorting supports and eliminate export subsidies and single desk exporters.

DOMESTIC TRADE ISSUES
Transportation
46. AAW believes that all commercial vehicles operating within U.S. borders must meet uniform safety standards.

Labeling
47. AAW supports mandatory Country of Origin Labeling (COOL) on all imported agricultural and aquacultural products at the final point of sale to consumers. Ideally, this would include restaurants. The country of origin should be clearly stated and large enough to be easily identified by the consumer. Imported products should meet the same grading, phytosanitary and production standards as domestic products.

48. AAW recognizes the need for food safety and traceability mechanisms; however, the added cost of implementation must not be borne solely by the producers.

Market Consolidation
49. AAW supports strong congressional oversight of market consolidation. AAW believes that retail consolidation restricts trade and decreases market access for small farmers.

RURAL ECONOMIC DEVELOPMENT
50. AAW urges family farmers to investigate agri-tourism and alternative crops, which might add profit to the farming operation.

Telecommunications
51. AAW supports a full range of ownership of telecommunications infrastructure including entrepreneurs, large corporations, municipalities, and other units of local government.

52. AAW supports federal resources to build out fiber-based telecommunications for support of telehealth, electronic medical records and advancements in remote healthcare, and education and training, especially in information technology and science-related fields.

Innovation
53. AAW supports policies and funding to support development of an innovation culture in rural America through transmission of land grant universities’ research discoveries into commercial ventures and support of county and regional efforts by nonprofits and educational institutions to develop entrepreneurship in youth and adult populations.

Cooperatives
54. AAW supports the ability of farmers and ranchers to join together in cooperatively-structured enterprises, recognizing the importance of protecting and strengthening the ability of farmers and ranchers to join together in a cooperative effort. This effort includes cooperatively marketing their products, and acts as a bargaining agent which ensures access to competitive markets.

55. AAW supports initiatives that will ensure that the Farm Credit System remains a reliable and competitive source of credit for farmers, ranchers, agri-businesses, and agricultural cooperatives.

56. AAW supports the Agriculture Committees’ continued jurisdiction over the Farm Credit Systems and regulatory oversight by the Farm Credit Administration.

Access to Capital
57. AAW supports lending policies that recognize the unique lending environment of rural areas.
Rural Hospitals

58. AAW supports continued appropriation of federal funds to keep rural hospitals operational and modern.

59. AAW supports continued levels of Medicare funding or provisions for funding if Medicare funding declines because of the portion of Medicare that supports rural health services.

GLOBAL ISSUES

60. AAW recognizes the need for an international forum for countries to discuss their differences and cooperate on problems of common concern.

61. AAW opposes the U.S. government granting any authority to the United Nations regarding the use or management of any federal, state, or private properties of the United States.

62. AAW opposes the U.S. government granting any taxing authority to the United Nations.

63. AAW supports the concept that the U.S., not the U.N., establish the criteria to be met by developing nations prior to receiving U.S. food aid. We support giving “food” in food aid rather than dollars. We recognize that the U.S. needs to provide a steady level of food aid, every year, on which the international humanitarian community can rely. At a minimum, food donations should total at least 6 million metric tons annually.

64. AAW opposes the reauthorization of any designated biosphere reserves within the U.S. or its holdings and any new designation of reserves in the future.

65. AAW opposes the use of U.S. land holdings for barter of U.S. debts to foreign nations. U.S. lands are owned by people of the United States of America and were never intended to be used for barter. Every effort should be made to re-lease those holdings that have been transferred.

66. AAW recognizes the need for international self reliant farm programs for developing and/or war-torn countries.

67. AAW opposes any legislation, such as Cap and Trade and clean energy bills, that put U.S. agriculture at a competitive disadvantage with other countries.

68. AAW asserts that any new U.S. climate change policy must deliver environmental progress without harming the economy or U.S. food production.

COMMODITIES

A domestic food, fuel, and fiber supply must be the basis of our national security.

AAW recognizes that U.S. farmers and ranchers continue to provide a safe and abundant food supply in a healthy environment.

The future well being of the world depends upon modern, progressive production capabilities and practices of U.S. agriculture.

69. AAW supports the use and protection of existing and new seed technology for food, feed and fiber to advance a higher economic benefit and to assure an abundant and secure domestic and global food supply.

70. AAW demands the retention and continued development of the US Department of Agriculture. AAW believes the USDA is imperative for the continued global success of our national food, fuel and fiber product security.

71. AAW supports legislation that will enhance domestic and international market growth and also supports legislation that exempts food from trade embargoes.

72. In the event of a natural disaster, AAW supports timely government assistance to affected agricultural producers.

73. AAW supports an efficient and modern transportation infrastructure, which enables U.S. farmers’ and ranchers’ access to domestic and world markets. The general lack of transportation infrastructure maintenance, including locks and dams, and railroad monopolies, put all U.S. agriculture and the world food supply in jeopardy.

DAIRY AND LIVESTOCK

74. AAW believes that federal orders best serve U.S. dairy policy, dairy producers, handlers and consumers when structured and administered with uniform and equitable classified pricing regulations, based on product utilization and market returns, regardless of geographic location.

75. AAW recognizes that increased global demand for meat, milk and eggs compels agriculture to use the latest technological tools.

76. AAW supports availability of new products to safeguard the health of animals.

77. AAW supports the responsible use of antibiotics and other industry-approved treatments to safeguard animal health.

78. AAW supports increased funding for agricultural research and development through Land Grant universities and the U.S. Department of Agriculture (USDA) to ensure the necessary increases in productivity and safety of food producing animals.

79. AAW supports an enhanced infectious disease monitoring and testing program of imported and domestic animals and meat in order to maintain consumer confidence and market stability.

80. AAW opposes announcements of suspect cases of infectious zoonotic diseases.

81. AAW supports announcements of confirmed cases of infectious and zoonotic diseases.

82. AAW supports interstate shipment of meat from state-inspected processing plants where state regulations are equal to or exceed federal regulations.

83. AAW urges the USDA to work with state and federal animal health officials to identify all animals imported into the United States.

84. AAW recommends that any federally mandated surveillance and food safety programs be accompanied with adequate federal funding.

85. AAW supports research and education into standards of care that ensure animal well-being and profitable ways to raise livestock set by marketing demands. This should require the use of peer-reviewed research-based science.

86. AAW supports mandatory Country of Origin Labeling (COOL) to promote consumption of U.S. products.

87. AAW urges Congress to promote policy and regulations that encourage flexibility by the livestock industry to make responsible management decisions on breeding, disease surveillance, marketing, environmental conditions, and other issues that affect the livestock industry and the welfare of animals.

88. AAW supports an effective track and trace system that is cost effective to producers and enhances public confidence in the food supply.

89. AAW supports legislation to clarify that Congress did not intend to regulate manure under the Comprehensive Environmental Recovery Compensation and Liability Act (CERCLA) or the Environmental Protection and Community Right-to-Know Act (EPCRA), known as Superfund laws.

GRAINS

90. AAW supports and promotes alternative uses of all grain and related byproducts produced in the United States. We support a national energy policy that includes a renewable fuels standard (RFS) for all transportation fuels and less dependence upon foreign oil.

91. AAW encourages a coalition of feed, grain, and livestock organizations to assure a unified voice for animal agriculture.

92. AAW supports the 2008 Farm Bill as is.

FRUITS & VEGETABLES

93. AAW supports the U.S. Department of Agriculture’s efforts to increase fruit and vegetable consumption in federal food programs.

94. AAW supports the continued education of consumption of fresh produce which provides tremendous health and economic benefits to both consumers and growers.

SPECIALTY CROPS

95. AAW recognizes and supports a diverse specialty crop industry, which includes edible and non-edible crops.
NEW CROPS/New USES

100. AAW supports rebuilding viable and vibrant pollinator communities, through continued research across all lands to improve resiliency and functional redundancy in pollinator populations, and to improve long-term profitability of agriculture. Pollinators are vital to production agriculture. Most fruit, vegetable, forage and seed crops plus crops that provide fiber, drugs and fuel require the pollination services provided by managed and native or “wild” pollinators.

101. AAW supports promoting pollinators through further revisions to USDA Natural Resource Conservation Service (NRCS) field office technical guides and conservation practices.

NATURAL RESOURCES

104. AAW supports the benefits of multiple uses of natural resources.

105. AAW recommends policies that promote and ensure abundant, renewable natural resources and a healthy, productive environment.

106. AAW supports the use of natural resources to produce food, clothing, shelter, and fuel as a priority for America’s national security.

107. AAW believes that government agencies that are using decision-making power to affect natural resource industries need to be held accountable for their decisions. There should be:

- specific timetables,
- timely efficiency reports,
- analysis of public and private costs of implementation,
- balancing of harms and benefits,
- analysis of the effect of no-management actions.

PUBLIC LAND & ANIMAL RESOURCE MANAGEMENT

108. AAW expects government to comply with the same standards imposed on citizens and businesses regarding the management of natural resources and wildlife.

109. AAW supports continuation of the Federal Animal Damage Control program as a priority responsibility of agencies involved in wildlife management to protect private and public property.

110. AAW supports active, responsible management of wildlife.

*Wildlife overpopulation, overgrazing, polluted streams, passing of disease from infected animals and extensive crop damages are but a few intolerable consequences of wildlife mismanagement.

LAND USE

111. AAW supports the preservation of our nation’s sovereignty and our Constitution as the supreme law of the land.

112. AAW believes that good stewardship of our natural resources is best assured by those who have made both financial and labor investments to become owners and caretakers of their land. *

*Even though local, state and federal governments own more than 40% of the land in the United States, some groups seek additional purchases of private property by, or through, the government. The continued purchase and taking of private property by the government or government funded organizations, using government funds, erode the very foundation on which this country, its principles, freedoms, economy, health and productivity of its natural resources are based.

113. AAW recognizes that a family farm or ranch is a form of business enterprise in which the entrepreneurial decisions are made by individuals engaged in the production of food, feed, fiber, fuel, forest products and/or flora for profit, which provides a major source of income and capital for investment.

114. AAW opposes the elimination of productive agriculture lands to constructed artificial wetland.

115. AAW opposes any authority given to the United Nations or foreign governments regarding the use or management of any federal, state or private properties within the boundaries of the U.S. and its holdings.

116. AAW opposes the designation of scenic byways, flyways, waterways or any other designations and the resulting restrictions on private lands in the U.S.

Public Lands

117. AAW supports access to unappropriated federal lands for multiple uses.

118. Multiple uses include but are not limited to agriculture, grazing, mining, drilling, forestry, habitat and recreation.

119. AAW supports a policy of no net loss of taxable private property.

120. AAW opposes preferential treatment to sellers or buyers of private land through tax incentives or other measures to nonprofit entities.

121. AAW supports efforts to prevent entities from setting up “shell” foundations in order to obtain funds on conservation payments.

122. AAW supports restricting and monitoring the conditions by which private non-profit groups and non-governmental organization (NGO) groups can purchase land with the intent to sell or transfer ownership of that land to the government.

The federal government must show where their authority comes from to acquire land or take the use of the land.

123. AAW expects Congress to fully appropriate and to disperse PILT (Payment in Lieu of Taxes) to local governments in a timely matter, as required by law.

124. AAW opposes the designation of additional wilderness areas.*
2010 Position Statements

Private Property Rights

125. AAW supports legislation that reinforces our citizens’ constitutional private property rights that requires just and complete compensation at the highest and best use for the taking of private property.

126. AAW opposes “takeings” legislation that devalues land by:

- regulatory action,
- activities that negatively impact adjacent land by creating buffer zones, scenic viewsheds, and scenic viewscapes, or
- activities that impact landowner’s rights in any way, or
- by endorsing conservation easements.

AAW contends that water is property [the Hage vs. United States Takings case, January 28, 2004]. Any reallocation of the water permitted for private use by government is a takings. Government is obligated to compensate the owners of privately held water at the highest and best use of the property when the public deems a necessary beneficial use of that water.

127. AAW strongly supports private property owners and the sovereignty of states above the federal government regarding allocations of water within their borders.

128. AAW urges Congress to take no action outside those enumerated powers found in Article 1, Section 8, of the United States Constitution that would infringe upon the rights left to the states and to the people. Article 1, Section 8, enumerates these rights, which are limited.

129. AAW opposes the right to float or trespass on private property.

Eminent Domain

130. AAW opposes the use of Eminent Domain for the purchase of private property from an owner to transfer to another private or commercial owner.

131. When property is taken, the owner must be compensated at highest and best use.

132. AAW opposes the use of Eminent Domain for economic development and additional tax revenue accruing from such development.

133. AAW strongly opposes the taking of private property by postings on the Internet only or without other proper legal notification.

134. Before exercising Eminent Domain, every effort should be made to use existing public land.

135. AAW opposes the taking of private property by Eminent Domain to construct the planned NAFTA Transportation Corridor that will reach from Mexico to Canada.

ENDANGERED SPECIES ACT

America’s security depends upon our military and domestic food and energy supply and must therefore take precedence over the regulations of the Endangered Species Act (ESA).

136. AAW supports the value of human life and safety above any other species whether endangered, threatened or not listed.

137. Funding for the Endangered Species Act (ESA) needs to be discontinued until such time as the Act is re-authorized and the means for funding re-evaluated.

138. AAW supports a requirement that the Environmental Impact Statement (EIS) and Critical Habitat designations be completed before restrictive regulatory action is taken. Concurrent social, economic and environmental cost/benefit analyses and compensatory adjustments for takings deemed necessary for species protection is required.

139. AAW supports requiring the use of sound, verifiable, research-based science giving equal weight to historical data of the land before a listing is approved.

140. AAW supports eliminating subjective biological units (sub-species, populations, stocks) from ESA action and pursue recovery of only significant species.

141. AAW supports the protection of property owners from regulatory takings by local, state and national agencies. If property is taken, owner must be compensated at highest and best use and for loss of income and expenses.

142. AAW supports allowing a state or private property owner who is sued for an alleged ESA violation to continue with existing farming, logging, fishing or mining practices until the suit is resolved.

143. AAW supports requiring feasible recovery plans and selection of recovery measures that are most cost effective and have the least negative social and economic impact.

144. AAW supports accountability by reviewing and evaluating recovery plans every five years.

145. AAW supports allowing an administrative appeal of qualified major decisions and/or judicial review by qualified affected parties.

146. AAW supports excluding a species from consideration as endangered or threatened, or de-list it, if it is abundant in any location.

147. AAW urges that the EPA acknowledges “exinction” as a natural process of evolution.

148. AAW believes only native species should be considered for endangered species status.

INVASIVE SPECIES

AAW does not view all non-native species as invasive, nuisances, noxious, or harmful. It is well known that migratory flyways can and do change. Weather, volcanic eruptions and earthquakes can and do cause variations to migration. Oceanic currents can and do cause variations to historic ranges of species. These and other acts of nature cause relocation of species.

149. AAW believes the phrase, “invasive species” needs to be defined as a specific set of scientific criteria and this distinction needs to be made clear in open debate.

FORESTRY & TIMBER

Our nation has more forested acres and trees today than a hundred years ago. Natural and renewable, trees offer many benefits to our communities, nations, and world. Trees can provide goods, recreation, and wildlife habitats. They clean and cool the air we breathe and protect our water and fisheries. We have a moral obligation to make wise use of these resources and make sure these forests are standing tall for future generations to use and enjoy.

Our public national forests are sick and dying. Today’s public forests are growing 10 to 100 times more trees per acre than the forested lands at the time Native Americans managed them by fire. The overcrowded forests result in insect damage, disease, and the loss of groundwater. These unhealthy conditions make the forests vulnerable to catastrophic wildfires.

Forest fires are more frequent, bigger in size, and catastrophic in nature. Forest fire costs do not reflect the cost of the burned trees, watershed damages, homes, ranches, wildlife, or livestock that are lost. Fire costs now account for nearly 80% of the annual Forest Service budget. The most devastating wildfires, only 1% of all wildfires, consume 95% of all the burned acres and 85% of all the suppression costs. Creating a separate fund would allow these extraordinary emergency fires to be treated the same way as other natural disasters.

150. AAW urges Congress to support the Forest Service in implementing their National Forest Plans by:

- removing the excessive carbon emis-
151. AAW supports creating a separate fund to allow extraordinary wildfires to be treated the same as other natural disasters.

152. AAW urges Congress to support the US Forest Service in implementing their National Forest Plans.

153. AAW urges Congress to release to multiple uses the acres that do not qualify for wilderness and settle the 40-year-old issue of roadless designation.

154. AAW opposes the sale of national forest lands to fund the purchase of more federal lands.

155. AAW urges the Farm Bill to offer cost sharing toward environmental quality incentives, tax incentives for developing renewable energy sources, habitats, and/or water improvements.

156. AAW urges the expansion of the domestic forest products market to encourage private forest owners to keep and manage their forests. We lose a million acres annually to development.

158. AAW supports the maintenance and continued investment for development of dams, levees, canals and other engineered facilities that provide multiple benefits to people and nature.

159. AAW urges Congress to immediately reaffirm the initial, established purpose of the U.S. Army Corps of Engineers and the Bureau of Reclamation. The purposes of flood control, navigation and irrigation projects have served both the government and the economic development efforts of this country.

160. AAW supports the funding and construction of new 1200-foot locks and maintenance of the existing 600-foot locks for the Upper Mississippi River and Illinois Waterway System.

161. AAW supports the implementation of a plan for systemic flood protection for the Upper Mississippi and Illinois Rivers.

162. AAW opposes the use of Inland Waterways for large-scale wetland restoration that removes agricultural land from local tax rolls and prior converted cropland.

163. AAW urges Congress to disallow immense public investments, such as dams, to be arbitrarily and capriciously destroyed. Prior to any purposeful alteration or destruction of these public investments or their uses, the government should show research-based scientific and economic proof that this action is vital to national security and necessary for benefit to humans as well as to the environment, as required under the original intent of the authority of the Corps of Engineers.

164. AAW advocates policies that promote abundance of water resources.

165. AAW strongly encourages retention of the word “navigable” in the Clean Water Act.

166. AAW opposes proposed changes to Clean Water Act that expand federal government’s jurisdiction over all intrastate waters including groundwater, ditches, culverts, pipes, desert washes, sheet flow, erosional features, farm and stock ponds and prior converted cropland.

167. AAW believes that a dedicated and secure water supply is critical to national and food security.

168. AAW urges Congress to honor its contractual obligations to agricultural water users throughout the West who rely on federally constructed water projects for irrigation supplies. Full contract supplies are essential to maintain the West’s productive farmland.

169. AAW does not support land retirement as a means of relieving the U.S. government’s contractual obligations to provide water and/or drainage service to the West.

170. AAW opposes foreign ownership of water and water treatment and distribution utilities.

171. AAW opposes federal purchase of privately held water rights in cases where the federal government would then hold the water right.

172. AAW supports a prominent role of agriculture in determining water allocation due to the economic and social necessity of producing enough food, fiber, and fuel to accommodate the domestic population and to build the economy by marketing value added and surplus commodity products.

173. AAW objects to a national policy of minimizing impacts to wetlands, versus previous policy of maximizing impacts to wetlands.

174. AAW objects to public funds supporting easements or buyouts to non-profit groups for large-scale wetland restoration that removes agricultural land from local tax rolls and other local economic activity.
175. AAW supports the Supreme Court ruling that the U.S. Army Corps of Engineers does not have jurisdiction over wetlands that are not adjacent to navigable waters.

WATER QUALITY

Livestock

176. AAW opposes efforts to regulate livestock manure as hazardous waste under Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) or other environmental laws. We support legislation to clarify that manure was never intended to be regulated as hazardous waste.

Non-Point Source

177. AAW supports a national water quality policy on nonpoint source pollution that gives states the control to develop and manage water quality programs specific to the states’ own watershed issues.

178. AAW supports revising water quality standards based on real risk to human health as determined by research-based scientific methods.

Data and Monitoring

179. AAW strongly promotes funding the monitoring of targeted waterways and the collection of data for accurate decision-making in the allocation of state resources for water protection programs.

180. AAW expects the federal and state elected officials and agency staff decision-makers to use credible, current records on historical data to establish reasonable and attainable year-round water temperature standards for rivers and streams.

181. AAW supports cost/benefit analysis and adequate funding including risk assessments before state and federal regulations are imposed on communities.

182. AAW supports the U.S. EPA assisting states in establishing a designated-use classification system for state surface waters. A designated-use system would allow for water quality standards to be applied by type of stream. For example: an agricultural irrigation or drainage ditch should not be required to meet the same standard as a pristine stream.

ENERGY

A well-developed diverse domestic energy supply is critical to national security.

184. AAW supports the 25 X'25 Initiative of having 25% of the U.S. renewable energy sources being produced by farms, ranches, and forests by the year 2025.

185. AAW supports the use of alternative fuels, such as ethanol, biodiesel, wind energy, and biomass fuels, because:
- alternative fuels are an abundant renewable resource;
- alternative fuels are important to our nation’s energy security;
- alternative fuels are environmentally friendly.

186. AAW supports development of domestic oil, coal, and natural gas supplies on public and private land as well as offshore, as applicable.

187. AAW supports the creation of new refineries and the continuous updating of existing refineries. Agriculture production and distribution is dependent on the oil industry.

188. AAW supports continued research of nuclear energy and development of new plants.

PUBLIC UNDERSTANDING AND AWARENESS

ANIMAL WELFARE

189. AAW supports the responsible treatment of animals and livestock industry participation in the development of any new policy to regulate treatment practices.

190. AAW opposes any legislation or regulations that would allow HSUS, PETA, or any other anti-animal activists access to slaughterhouses and private animal handling facilities for any reason at any time. Only highly qualified and uniformly trained states’ department of agriculture employees should have access to properties for inspections at slaughterhouses or any other animal handling facility; that the animal processing industry by its very nature is vulnerable to attacks by animal rights groups.

191. AAW respectfully asks legislators, when they are approached by animal rights representatives to carry bills pertaining to animal health, to talk with actual livestock producers about the legislation in order to learn why producers use these practices for the well being of their animals.

192. AAW supports the responsible use of animals in research.

193. AAW supports strong federal criminal penalties and civil remedies for violent, threatening, obstrucive, and destructive conduct that is intended to injure, intimidate, or interfere with animal enterprises and research.

194. AAW supports development of modern and environmentally sensitive disposition of aged and infirm horses in the US.

195. AAW supports the right of farmers to protect their records from public scrutiny.

196. AAW supports the legalization of horse slaughter plants to guarantee the humane transportation of horses for processing across state and international borders.

197. AAW supports the sale, possession and humane transportation of horses for processing across state and international borders.

198. AAW supports the use of standardized best management practices in livestock carcass disposal.

CLEAN AIR

199. AAW supports a clean air standard providing an agricultural exemption for dust particulate matter generated as a result of agricultural activities. Any definition including dust as a contaminant must exempt production agriculture.

200. AAW supports research efforts to identify agriculture’s role in carbon sequestration. Carbon sequestration, the process by which carbon gases are captured and stored, presents potential technological solutions to the build-up of carbon dioxide in the atmosphere.

CROP PROTECTION

Pesticide Application and Runoff

201. AAW strongly urges the passage of legislation to clarify that crop protection products are under the jurisdiction of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), which provides the basis for regulation, sale, distribution and use of pesticides in the U.S. It was never intended that pesticides, labeled and legally applied under FIFRA, should be regulated as pollutants under the Clean Water Act. The ruling of the Sixth Circuit Court of Appeals vacating the USEPA regulation
 waiving pesticide application on waterways and contiguous fields as a pollutant needs to be corrected with federal legislation. The ruling brings producers under Clean Water Act permits – a position opposed by AAW.

Methyl Bromide

202. AAW supports the continued use of methyl bromide in the U.S. to provide fairness and equity with other nations in the world. Sound science to date shows that methyl bromide is neither a carcinogen nor a reproductive toxicant. Elimination of this tool would impose unnecessary and severe economic impacts on the U.S. farmer. We support research for cost effective-alternatives to methyl bromide.

203. AAW supports the re-registration of current fumigants and continued development of new fumigants for crop production and export opportunities.

Phosphine Fumigation and Food Quality Protection Act Resolution

204. AAW urges regulators to provide for additional input from stakeholders through review of any scientific inconsistencies or unwarranted limitations in the new restrictions for aluminum/magnesium phosphine fumigants.

Anhydrous Ammonia Fertilizer

205. AAW supports the chemical industry’s anti-methamphetamine task force activities regarding the prevention of the use of anhydrous ammonia for illegal purposes.

CHEMICAL REGISTRATION

206. AAW urges Congress to continue oversight of EPA in its review of Section 18, Section 24C and Crisis Exemption requests by the states, manufacturers and third parties.

207. AAW supports the counterpart regulations jointly developed by EPA, National Oceanic and Atmospheric Administration (NOAA), U.S. Fish and Wildlife Service (USFWS) and United States Department of Agriculture (USDA) to streamline the Federal Insecticide Fungicide, & Rodenticide (FIFRA) regulatory process. The new program ensures that regulatory protections are in place for threatened species and ensures timely and continued access to safe and necessary pest management tools.

208. AAW supports the use of sound, peer-reviewed science in decision making regarding crop protection products, including products such as atrazine.

209. AAW opposes a zero tolerance requirement for spray drift. With today’s technology – and the ability to test parts per trillion – it is impossible to get to zero. The requirement should be that products be applied according to the label law.

FOOD SAFETY

210. AAW supports industry-coordinated federal standards to protect the US food supply while maintaining consumer confidence in the safety of U.S. agricultural products.

211. AAW strongly supports the Food & Drug Administration’s decision to allow the irradiation of food products and education on how to minimize food-borne pathogens.

212. AAW supports:
   • the implementation of animal health emergency management and eradication programs,
   • traceability of all food products,
   • Hazard Analysis Critical Control Point (HACCP),
   • continued worldwide surveillance activities,
   • monitoring of the status of foreign and domestic animal diseases,
   • and inspections at the border to maintain a safe and abundant food supply for the American people and the world population.

AGRICULTURAL RESEARCH

213. AAW supports continued research and development of tools and techniques that would support the advancement of agricultural production and processes in the United States for the industry and the consumer.

BIOTECHNOLOGY

214. AAW supports the expansion of biotechnology in agricultural research and production to provide agricultural producers with a greater range of management tools. Biotechnology gives greater flexibility to agricultural producers in making responsible management decisions by reducing input costs, increasing crop yields, promoting integrated pest management, and providing environmental protections to our natural resources.

215. AAW supports the coordinated framework and extensive testing procedures of biotechnological products by the U.S. regulatory agencies (EPA, FDA, and USDA).

216. AAW supports the position that it is unnecessary, confusing and costly to the consumer to label biotechnological products or processes.

217. AAW supports the position that any Biosafety Protocol that is implemented should be based on risk assessments and research-based science.

218. AAW condemns the theft or destruction of agricultural research and intellectual property. Research has tremendous benefits to the farmer and the consumer. These genetically-enhanced products have the capability of improving human health, and solving world environmental and nutritional problems.

219. AAW stands behind long-standing APHIS regulatory noxious weed authority that evaluates genetically-engineered plants that are no different than any other plant using the defined criteria that a plant must cause direct harm or physical injury to a protected interest to be considered a noxious plant. Risk assessment should not be made based entirely on economic factors associated with the plant.

TERRORISM

220. AAW condemns all forms of terrorism. As providers of this nation’s food and fiber supply, we recognize the need to increase our vigilance to protect the production of agriculture products (food, feed, fuel, fiber and flora and the inputs required for production).

221. AAW supports efforts to educate producers about ways to safeguard our nation’s food and fiber supply and agricultural inputs from acts of terror.

EDUCATION

222. AAW believes in an educated public. Furthermore, agricultural education and education about our nation’s food and fiber system should be based on factual information and research-based science. We encourage agriculturalists to work cooperatively on common issues through education.

223. AAW supports the intent of the Carl D. Perkins Act with increased funding for vocational (career and technical) agriculture education.

224. AAW supports a national Agriculture in the Classroom (AITC) program with continued funding and support for a national director.

225. AAW opposes any authority given to the United Nations or foreign governments regarding the education of America’s children.

226. AAW supports time honored American values such as free thought, individual freedom and constitutional private property rights.

227. AAW opposes education and/or curriculum that erodes the above basic freedoms.
Anticipated Schedule – Subject to change
6:00 and 9:00 p.m. – Tuesday evenings
Channel 230 – DISH
Channel 344 - DIRECTV

May 4  Managing Risk – Marketing Commodities
Betty Corbin, Susan Dodsworth

May 11 Adding Value to Operations Through Agri-Tourism
Jane Eckert, Nancy Patterson, Brenda Renyer

May 18 Increasing Consumer Awareness
Charlie Arnot, Heather Hampton+Knadle

May 25 Informing Policymakers
Sandy Greiner, Jay Vroom, Marcie Williams, KS Agri-Women, IL Agri-Women

June 1 Promoting Your Products
Vicki Coughlin, Ardath DeWall

June 8  Managing Risk Through Crop Insurance
Dr. Art Barnaby, Shirley Bartelt, Penny Lauritzen

June 15 Educating Students About Agriculture
Cathy Musick, Provider Pals

June 22 Accessing Farm Credit
Doug Hofbauer, Janet McPherson, Bowers family

June 29 Resources for Women in Agriculture
Chris Wilson, Iowa Women in Agriculture

July 5 Business Planning
Doris Mold, Sharon Rogers

July 12 Entrepreneurship
Dr. Donita Whitney Bammerlin, Nancy Patterson, Brenda Renyer, Sharon Rogers

July 19 Leadership
Development & Networking
Marcie Williams, Neil Strong, Rex Martin, Syngenta participants
Michele Payn-Knoper, Jacque Matsen, Amanda Nolz

American Agri-Women Show on InCountry Television

Kathy Patton Strunk and Cathy Musick in studio on the set for the American Agri-Women Show.

WANTED:
AAW Nominations

Nominations are due for AAW awards and officers over the next few months. The LEAVEN Award is the American Agri-Women award for those AAW members who are outstanding and deserving of recognition for their efforts for agriculture and service to AAW.

The LEAVEN Award is presented annually during national convention. Recipients are nominated by AAW affiliates. An awards committee comprised of four former Leaven Award winners makes the final selection. Nominations are due from affiliate organizations by August 1 and the form is online in the AAW Policy and Procedures Manual. This year’s Leaven Award chair is Merlynn Verstuyft, P.O. Box 33, Knippa, TX 78870, email verstuyft@aciglobal.com, phone 830-934-2638.

The Veritas Award is presented by AAW to the person or persons who have given public witness to “the pursuit of truth” in accordance with the principles enunciated in the AAW statement of philosophy, The Call to Power. Of specific interest is responsible media coverage of issues, events or personalities of critical importance to the agricultural industry. Preference is given to persons or institutions which are not directly connected with the agricultural industry; that is, they are not required to rely on agricultural interests as a means of livelihood. Nominations are due by June 30 to Jacquie Compston, chair, P.O. Box 108, Wellington, NV 89444, jacquiecompston@hughes.net, phone 775-465-2279 or 775-721-3381.

AAW will elect two new executive committee officers at 2010 Convention in St. Louis. The offices to be filled are vice-president for education and secretary. Qualifications considered for both offices include commitment and leadership experiences in AAW and its affiliates. Nominations require signature endorsements, preferably by officers of the nominee’s affiliate. The vice-president for education nominee should be a member with experience and expertise in education and delivery of programs for educating students about agriculture. The secretary nominee should be a member skilled in keeping records of meetings and related duties. In addition, nominees should be qualified to serve as members of AAW’s executive leadership team. The nominating committee will also be filling three director positions on the AAW Resource Center Board of Directors. Nominating forms for the AAW and AAW Resource Center positions are also online in the Policy and Procedures Manual and should be directed to Arlene Kovash, nominating committee chair, 11425 Pedee Creek Road, Monmouth, OR 97361, akovash@earthlink.net, phone 503-838-3512. Deadline July 1, 2010.
A GW Leads the Way
For Syngenta Media Training

Members of the 2010 Syngenta AAW “Leadership At Its Best” class are Lori Bammerlin, Manhattan, KS; Jody Bloemke, Mankato, MN; Marie Bowers, Redmond, OR; Lisa Condon, Horicon, WI; Susan Dodsworth, Franklin, IL; Lisa Funk, Turlock, CA; Elaine Gaesser, Corning, IA; Laurie Goodwin, Kekaha, HI; Jenny Inman, Owensboro, KY; Janell Lagein, Rock Lake, ND; Christine Lott, Sacramento, CA; Mary Meinhart, Montrose, IL; Jennifer Oechsner, Brownsville, WI; Cari Rincker, New York, NY; Hannah Schneider, St. Paul, MN; Pamela VonRuden, St. Paul, MN.

A highlight for this year’s class was being the first of Syngenta’s leadership groups to have social media training and the inaugural group for the “Leadership at its Best” website. Leadershipatitsbest.com is a social media “ning” website where graduates of the Syngenta training can network and find resources for speeches or other leadership tools. Any AAW member who is a Syngenta graduate is encouraged to go to the site and sign up for access to the site. It’s up to AAW to try out the site and work with it to pave the way for the commodity organization leadership groups Syngenta will host later in the year. The social media training was conducted by Sigma Alpha alum and AgChat founder Michele Payn-Knoper, who spoke at the 2006 AAW Convention in Miami.

Monsanto Holds Farmers Mom of the Year Contest

Monsanto has an AmericasFarmers.com website, where they have posted facts about farming and a “thank a farmer” section. This year, they decided to host an America’s Farmers Mom of the Year contest and asked American Agri-Women to judge the entries. Monsanto and AAW publicized the contest, and individuals were invited to submit nominations online or by mail. The entries were divided into five regions. All nominations were assigned a number and names were removed for the judging. AAW President Chris Wilson was responsible for the judging criteria and selection of the finalists from each region. Among the finalists in the Midwest Region were AAW members Cheryl Day (IL) and Sue Kruger (MN). Monsanto’s public relations firm selected the regional winners, who each received $5000.

The regional winners were:
Northeast Region: Sue Roohr, Cookstown, N.J.
Southeast Region: Erika Forsbach, Savannah, Tenn.
Midwest Region: Cheryl Day, Cerro Gordo, Ill.
Southwest Region: Carol Cowan, Watonga, Okla.
West Region: Caroline Luiz, Yreka, Calif.

The public relations firm conducted online voting for a national winner the first week of May, and over 4,600 votes were submitted. Carol Cowan, Watonga, Okla., was voted Monsanto’s America’s Farmers Mom of the Year 2010.

After reading hundreds of submissions, Wilson said it was very difficult to make the selections based on a limit of 300 words. But all the nominations were impressive. After expressing that we’d like to do something to honor all these farm moms, Monsanto offered to make a contribution of $5000 to AAW so that we can provide certificates of recognition to the moms who were nominated and to provide a year’s membership in AAW for the many who also have expressed interest in joining AAW.

A GW congratulates members who were nominated and those who were regional finalists and winners!

THANK YOU

I want to thank everyone at the AAW Mid-Year Meeting for their special concern and prayers for me when I was very sick, and had to be hospitalized. Special thanks to one of our new Colorado AAW members, Becky Rowenkamp for driving me to the hospital, and the time Carolyn Kleiber, Karen Yost and Chris Wilson spent with me at the hospital. The staff on 9th floor at Presbyterian St. Lukes Medical Center in Denver was very impressed with the AAW members they met. The Team Leader of the Medical Dr’s, Dr. Sandy Durani said, “I’ve never met such a respectful, more caring, professional group of ladies.” I can’t agree with Dr. Durani more.

Thank you again

Ardath DeWall
What motivates a woman to take on a volunteer leadership position when her work and family already are demanding 100% of her time? Having just completed 12 years as president of Michigan Agri-Women, let’s get to know such a person and why she did it.

Sharon Noffke Schmuhl was born and reared on a farm on Kerlikowske Road near Coloma, MI, and has spent her entire life there except for college. “In our location, near Lake Michigan,” she says, “we have been able to raise and harvest almost all crops: fruits, vegetables, and grain…plus 100 head of feeder cattle every year.”

Sharon’s family farm was typical of the region, small compared to Midwest grain farms, but diversified. “Never have all your eggs in one basket” was a family motto. They started with asparagus, strawberries, cherries, raspberries, tomatoes, melons, peaches, plums, apples, and grain.

“My father was known as the Tomato King in our area because he saw tomatoes grown on stakes in Florida and soon we had a semi load of concrete reinforcement wire in our yard to make ‘wire cages’. At that time we had 20-plus acres of tomatoes for the fresh market.”

In the early ’70s cherry prices hit rock bottom and the Noffke family and their neighbor, whose son Sharon eventually would marry, picketed what at that time was Michigan Fruit Canners in Benton Harbor for at least cost of production, “never mind a profit, that was a dirty word in farming”.

All of the fruit and vegetable industry was paid by contract and, if there was no crop, they were not paid. Sometimes, even if they had a super crop, they were not paid until months after harvest.

Connee Canfield, a nearby pickle grower, was experiencing the same problem and founded Women for the Survival of Agriculture in Michigan. Sharon and her mother were editors of the WSAM newsletter for the next several years.

By the late ’70s/early ’80s, a door opened for marketing the Noffke crops in the form of the new Evanston Farmer’s Market on the north side of Chicago. Sharon recalls, “My dad, of course, said no, we are farmers and don’t have time to be running to Chicago with produce. But that fall we had a bumper crop of apples so my brother-in-law and I loaded up a pickup truck with apples, and headed for Evanston at 3:00 AM. When the IL vegetable farmers started showing up and setting up, we realized we had no tables, but we did have a canvas behind the seat of the truck, which we put on the ground and set our apple bags in rows, propped up by pieces of concrete from the adjacent railroad tracks, and we sold our load of apples. We were shocked. We learned that the consumers really did want fresh produce from the farm and they had questions to ask us, which we could answer; and the best part of all, we had cash flow on the farm.”

“We are still involved in several Chicago Farmer’s Markets, five days a week from June through October. We are best known for our peaches, tomatoes, berries and flowers, which our daughter, Kim, specializes in.” Sharon says her favorite job on the farm is working with the flowers, which includes helping Kim with her new business of preparing flowers for weddings and special events.

After marrying the farmer next door, she inherited his on farm snowmobile/ATV business doing the books, booking the product, advertising and anything other than the actual fix and repair work. Sharon’s other farm jobs vary from tractor work to organizing and loading trucks for the farmer’s markets, overseeing seasonal workers, and business decisions about planting, payroll and expenditures.

“My passion for farming came from my parents. Dad was inventive and mom was never going to marry a farmer!” , Sharon says with a smile. “From the time they were little, everyone contributed in some way. Our girls grew up at the Chicago Farmer’s Markets, hanging out in bulk boxes on the back of the truck. The customers felt sorry for them! My brother, sister, her husband, son and daughter, all with college educations and off farm jobs, also work on the farm and do markets. Mom, at 94, is still active, a member of MAW/AAW, and does her part for the markets.”

“When I assumed the reins of WSAM (now Michigan Agri-Women) I was told that the group would not survive,” states Sharon, adding with conviction, “I knew that it was not going to die on my watch. And with the help of the members it did not.”

“It was, and still is, hard to get women involved in the organization. But one makes time for what is important and our group, its involvement in AAW, the education and the opportunities that the organization provided to me, were well worth the effort. My time with MAW/AAW has been immeasurable in terms of what it has added to my life, both personal and vocational. To convey that to others is hard to do.”

“The future of Michigan Agri-Women is looking pretty bright. We now have younger women becoming involved. We have another group in Michigan, Farm Women’s Symposium, and we are getting a lot of feedback from them. My daughter, Kim, is involved with the symposium and Farm Bureau Young Farmers, MAW/AAW, and recently, through AAW, she had the opportunity to go to Syngenta Leadership Conference, which I did not due to farm involvement. All of these organizations should be working together for the ‘survival of the family farm’ and I believe that they are.”

Longtime MAW/AAW member Barbara Radewald, left, presents Sharon Schmuhl with the “Espirit DeCorps” award in appreciation of Sharon’s continued enthusiasm and ability to tackle issues large and small in support of agriculture.
Post Mid-Year Group Trots to Air Force Equestrian Center

This story is more about the man than the horses and due to space constraints you will have to go to the AAW website (www.americanagriwomen.org) to read about Billy Jack Barrett and the Equestrian Center. But if you’re looking for “heartwarming” and “inspiring” you will want to read about him. Pictured L-R on the ground: “Uncle Bob” Diehl; Marcie Williams; Jody Elrod; Karen Yost; Kelli Yost; Peggy Clark; Jane Marshall; Billy Jack Barrett and his daughter, Rebecca Barrett. On the fence: Joanna Wilson; Kathy Rhoads; Chris Wilson.
