After 40 years, American Agri-Women is still going strong because it meets members where they are in their life’s journey, in their career paths, and in their interest areas of food and agriculture. American Agri-Women is “A Force for Truth” and a Voice for women in agriculture.

Our strength lies in our ability to tap into the many talents and connections existing in our breadth and depth of diversity:
- Experience
- Commodity and business
- Geographic

We value each member’s ability to be a “Force for Truth” in her hometown, in a conversation with non-producing consumers or in Washington, D.C. The location depends on each member’s own schedule and preference.

American Agri-Women provides the resources to make her comfortable in the setting of her choice.
